

SEPARATOR WIRE ROD FOR ENDS

USE:

- 1° **THE WIRE ROAD** achieves the vegetation rods to be **OPEN and PARALLEL** from the end post, in order to ease the entrance of the vine shoots.
- 2° It is valid for all types of end posts.
- 3° It is easy and quick to install. The usage of tools, including screws and nuts, is not necessary

RODS DISTANCING FOR VINE ARBOR

ADVANTAGES OF THE "SYSTEM VITIFLOW"

1° GREAT ECONOMICAL SAVE

System Vitiflow allows us to save both on time and workforce up to a 70% from the traditional system (put the vine shoots by hand).

2° EASY INSTALLATION

System Vitiflow adapts to any kind of post, with the **ADVANTAGE** from other systems **TO BE MOBILE ALONG THE POST**, achieving more protection for the vine shoots.

3° **PERMANENT PROTECTION FOR THE VINE SHOOTS** in front of the breaks consequence of the strong winds.

4° **System Vitiflow** improves the **AIRING** and the **EFFICACY** of the treatments.

5° TRANQUILITY FOR THE VITICULTURIST

95% of the vine shoots introduce themselves on the wire remaining protected from the wind. The viticulturist **CAN** do other tasks such as desuckering, doing phytosanitary treatments, etc.

6° **QUICK AND EASY CLOSING** of **System Vitiflow**, with the **ADVANTAGE** that one person can close two arbor lines at the same time.

7° **IT DOES NOT BLOCK** equipment work such as the pre-pruning machine, grape pickers...as the spacer keeps integrated inside the post.

8° **System Vitiflow** solves the problem of the intermediate, defective posts, **WIRES THAT DO NOT SLIDE** correctly **OR THAT THEY LEAVE** by default from the slots protecting the wear of the vegetation wires.

9° **PROTECTION OF THE GRAFTS** from the plantation, avoiding to put the canes and the protectives. **ECONOMICAL SAVE.**

10° **System Vitiflow** presents itself in **AN ONLY PIECE**. It improves the usage and installation of the spacers. So, **IT IS QUICKER TO INSTALL.**
